

Patented in 1923, Durite is one of the toughest, long lasting anti-fatigue mats available today. Gives you dependable service indoors or out. Durite, the original tire-link mat, helps create foot comfort and safety traction especially where people stand for long periods of time. The open mesh construction provides excellent drainage and dirt retention. Durite mats are easily rolled up for storage. These industrial mats are perfect for in-plant applications at workstations, along assembly lines, in front of machines or in aisles and passages. Special sizes, beveled edges and irregular configuration available upon request.

Material: Recycled rubber links woven on galvanized wires.

Thickness: $\frac{5}{8}$ "

Surface: Open mesh.

Nosing Colors: Black, Yellow

Notes:

- For mats over 7' wide or 25' long a special handling fee will apply.
- Durite 108 matting is non-directional. All mats will be made in one piece if possible.
