

Cleaning Instructions: Waterhog Lift Truck Mats

- Vacuum regularly with a commercial grade vacuum
 - A commercial grade wet/dry vacuum is recommended for locations that encounter snow or heavy amounts of rain
- Extraction cleaning with a commercial grade machine is the preferred method for deep cleaning the mats in place
 - Regularly scheduled extraction cleanings performed once every 4-12 weeks in heavy traffic areas will help reduce dirt and wear patterns
- Pressure washing may be used for heavy cleaning
 - Tile/Mats should be taken outside or to an area designated for pressure wash type cleaning. The old installation type should be removed from the floor and mat
 - Pressure washed mats should be hung to dry
 - Mats should be dry before being reinstalled
 - Installation area should be clean and dry before reinstalling mats
 - Standard installation instructions should be followed to reinstall the mats using our tape down system
